DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 32 and 63, drawn to a video-on-demand system, classified in class 725, subclass 86.
- II. Claims 2-6, 26-31, 33-37, 57-62, 64-68 and 88-93, drawn to a notification system, classified in class 709, subclass 206.
- III. Claims 7-8, 17-25, 38-39, 48-56, 69-70, 79-87, drawn to a database updating system, classified in class 707, subclass 102.
- IV. Claims 9-16, 40-47 and 71-78, drawn to a search engine, classified in class 707, subclass 3.

The inventions are distinct, each from the other because of the following reasons:

Inventions I through IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable.

In the instant case, subcombination I has separate utility such as a system allowing a user to request videos/movies to match on the user's television. See MPEP § 806.05(d).

Subcombination II has separate utility such as a system allowing a user in a computer system to receive a notification that their profile has been viewed. See MPEP § 806.05(d).

Subcombination III has separate utility such as a system for transmitting data to a server and updating a database with the transmitted data. See MPEP § 806.05(d).

Subcombination IV has separate utility such as a search engine for submitting a query for data, wherein the data is transmitted to the user after the query has been processed. See MPEP § 806.05(d).

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.
